

Arpitha Jain C B

8792008746 — arpithaammujain39@gmail.com — LinkedIn — GitHub — LeetCode
Bangalore, Karnataka

Professional Summary

Motivated Computer Science undergraduate with strong foundations in Python, Artificial Intelligence, and Machine Learning. Experienced in building AI-driven applications, web platforms, and data processing pipelines. Passionate about solving real-world problems through technology, contributing to open-source projects, and continuously improving problem-solving skills through competitive coding.

Technical Skills

Programming Languages: Python, C, Java, Basic R

AI / Data Science: Machine Learning, NLP, Pandas, NumPy

Web Development: HTML, CSS, JavaScript, React, Flask, Streamlit

Tools & Platforms: Git, GitHub, VS Code, Jupyter Notebook

Experience

AI/ML Intern

Infosys Springboard

Jan 2026 – Mar 2026 (Ongoing)

- Working on a Fake News Authentication system using Natural Language Processing techniques.
- Responsible for data preprocessing and cleaning of large news datasets using Python and Pandas.
- Collaborating with a team to build a machine learning pipeline for detecting fake and real news.

Projects

Autism Assistant – Home-Based AI Integrated Therapy (Ongoing)

Python, Machine Learning, Streamlit

- Developing an AI assistant designed to support home-based therapy for children with autism.
- Implementing machine learning techniques to provide interactive therapy guidance.
- Building an accessible interface to assist caregivers in conducting therapy sessions.

SpeakUp Studio – AI Communication Support Platform

Python, Flask, HTML, CSS, JavaScript

- Developed an AI-based communication platform aimed at improving speech and interaction skills.
- Implemented backend functionality using Flask and designed responsive user interfaces.
- Integrated interactive modules to support communication training.

Sahayya Portal – Digital Complaint Submission System

HTML, CSS, JavaScript, Flask

- Built a web platform enabling users to submit and track civic complaints digitally.
- Developed backend logic using Flask to manage complaint data and requests.
- Designed responsive interfaces to improve accessibility for users.

Fake News Detection System

Python, NLP, Pandas

- Contributed to a team project for detecting fake news using machine learning techniques.
- Handled dataset preprocessing and cleaning using Python and Pandas.
- Assisted in building the text classification pipeline used for news verification.

Achievements

- Solved **500+ Data Structures and Algorithms problems** on LeetCode.
- Regular participant in **LeetCode coding contests** and competitive programming challenges.
- **Finalist – Mini Anveshana Innovation Event.**
- Coordinator of **CodeCraft Program** organizing technical learning activities.
- Participated in multiple **hackathons and technical competitions.**
- Active **open-source contributor** with GitHub projects and collaborations.
- Maintained strong academic performance with a **CGPA of 9.6.**

Education

B.E. in Computer Science and Engineering

2023 – 2027

SDMIT College, Dharmasthala

Visvesvaraya Technological University (VTU)

CGPA: 9.6 / 10

Certifications

- Infosys Springboard Certifications
- Udemy – Full Stack Web Development (Ongoing)
- NPTEL – Python for Data Science
- NPTEL – Machine Learning
- NPTEL – Soft Skills
